were qualified, that we would not be looking for quantity but for quality.

PRESIDENT: Senator Koch.

SENATOR KOCH: Mr. President, members of the body, it appears as though whatever we do with the Resolution that it would be after the fact. I was under the understanding before this morning that we were going to discuss the Resolution. We were going to discuss the merits on what alternatives we might have but I do have some questions. How many doctors and how many communities in this state would accept Vietnamese doctors and, secondly, did we really sent the experts who realize or know whether or not that these doctors do meet the accreditation standards of this state and, then thirdly, whether or not the state, the Legislature can sponsor these families to come to the state of Nebraska? I suspect that the horse is already gone and whatever we would do would be too late to try to head them off. Now, Senator Simpson, do you want to reply to those questions. There were several questions, if you were listening.

SENATOR SIMPSON: Would you separate them out and give them to me one at a time.

SENATOR KOCH: Yes, first of all, how many communities in the state of Nebraska would want doctors from this pool?

SENATOR SIMPSON: Well, I am not sure. At the present time, ....

SENATOR KOCH: Then how do we know how many doctors we are looking for?

SENATOR SIMPSON: I think we have one at the present time. We have two out of this group who are now coming. Two have been contracted for already out of this group for Sutherland, Nebraska.

SENATOR KOCH: Then it would appear that those communities such as Sutherland, who are really interested and do have a need, and would accept those doctors, they would be in Camp Pendleton and bringing them in on their own, their Chamber of Commerce's and others?

SENATOR SIMPSON: All I could add to that would be that in the group going out is a lady from Albion, I believe, and a gentleman from out in the North Platte area who are interested in behalf of their communities and are accompanying them at their own expense to see if it is possible that they can get some doctors. I think Albion wants two and I am not sure what the other gentleman is after.

SENATOR KOCH: Then, the second question was, will these people meet the accreditation standards of the AMA and the state of Nebraska and the Med College.

SENATOR SIMPSON: Dr. Duc, who is there and is going to do the evaluating, will decide whether they very possibly can. They still have to come back here and pass the test. This is not an assurance that they automatically will but we
